**Directions for the Do it Yourself Ring- Staple**

1. Cut out the four pieces along the dashed lines.
2. Take the *box* piece and mountain fold along the dot-dash lines.
3. Put glue on the tabs and assemble the box with the tabs on the inside.
4. Take the *side staples* pieces and mountain fold along the dot-dash lines, and valley fold along the dotted lines. This will make the pieces look like this from the side:
 
5. Put glue on the underside of the staples on unprinted side of the paper, and squeeze the front and back of the staples together. now the side view will look like this:
 
6. Put glue on the sides of the box where indicated. Position one of the *side staples* with the staples on the slot side and it's glue tab wrapping to side 1. Leave its plain area unattached for now. The first and last staple flap should be at the corners of box. Place the other *side staples* with the staples on side 2, the glue tab wrapping to side 3 and the plain side wrapping to side 1. Trim the plain side to fit. Finally, trim and glue down the plain area of the the first *side staples* to side 3.
7. Take the *top staples* piece and mountain fold along the dash-dot lines, and valley fold along the dotted lines. Glue the staples together as you did for the *side staples* pieces. Put glue on the top of the box where indicated. Place the *top staples* on the top of the box with the staples aligned with the glue lines.
8. Take the *soon-to-be ring band* and thread it into and out of the bottom of the box bringing glue area 1 through the slots. Place glue on glue area 1. Pull the *soon-to-be ring band* in the opposite direction so that glue area 1 rests inbetween the two slots in the bottom of the box.
9. Begin rolling the *soon-to-be ring band* upon itself (with the printed side on the inside), gluing as you roll; to form a ring that will fit the desired finger. Put glue on glue areas 2 and 3 and attach the ring at these points.
10. When dry, place ring on finger. Adorn Yourself
